LaTeX Symbols for Statistics and Math

A compact personal lookup sheet

May 2026

This note is a compact lookup sheet for symbols I commonly need in mathematics, probability, statistics, and asymptotic derivations. It is inspired by the Rice LaTeX mathematical symbols handout at https://www.cmor-faculty.rice.edu/~heinken/latex/symbols.pdf, with extra emphasis on statistical notation such as stochastic convergence, orders in probability, likelihood notation, and comparison symbols such as $\lesssim$ and $\gtrsim$.

Recommended Preamble

Most entries below work with the standard AMS packages:

```
\usepackage{amsmath,amssymb,mathtools,bm}
\DeclareMathOperator{\Var}{Var}
\DeclareMathOperator{\Cov}{Cov}
\DeclareMathOperator{\diag}{diag}
\DeclareMathOperator{\tr}{tr}
\DeclareMathOperator*{\argmax}{arg\,max}
\DeclareMathOperator*{\argmin}{arg\,min}
\newcommand{\indep}{\mathrel{\perp\!\!\!\perp}}
\newcommand{\dd}{\,\mathrm{d}}
```
